

WLAN REPORT

WISP Guide -worldwide -

Munich, October 2007

Dear WiFi Industry Specialist,

we are happy to present you our new issue of the **WISP Guide Q4 2007**.

For this issue we partnered with Spotigo to list **312 WISPs with live HotSpots** and aggregated the data in a compact format.

The WISP Guide is your quarterly One-Step Source to reveal the details about the market drivers and their geographical focus.

In order to give you a even better market insight view, we offer an extended WISP Guide Plus, that customfit the research results you gain to reach. Please contact us for an individual proposal.

All data is compiled by www.spotigo.com. If you have any updates on HotSpots or coverage, please contact Daniel Prümers at info@spotigo.com.

We wish you all the best in the exciting WiFi Year 2007/8 !

Best Regards

Michael Gebert

Colubris Networks...At your wireless service.

With over 30% market share, Colubris Networks is the leading provider of WLAN solutions for the hospitality industry.

Colubris WLAN systems, including access points, multiservice controllers and management software, provide much more than Internet access services. They enable hotels and restaurants to improve operating efficiency and increase customer service.

Hospitality Solutions

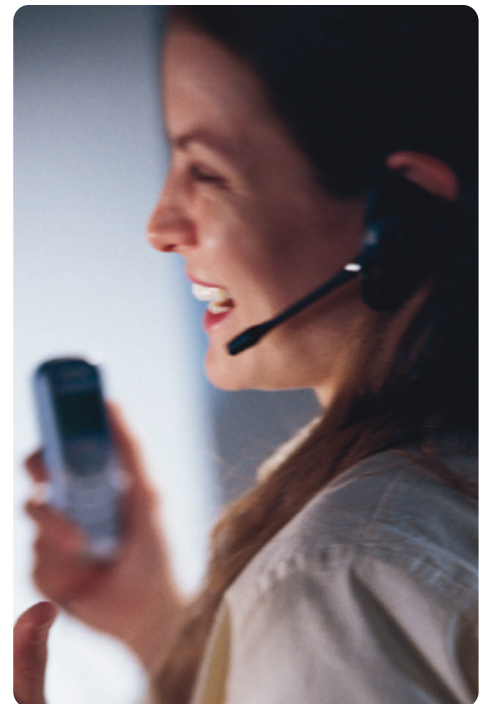

- Wireless high speed Internet access (HSIA) for guests
- Cordless property-wide phone service for staff or guests
- Increase room cycles by automating chambermaid services
- Improve repair/maintenance with WLAN access to ticketing systems
- Easy to use and install

Restaurant Solutions

- Wireless broadband Internet access for customers
- Wireless line busting improves customer service
- Improve inventory management by deploying barcode scanners
- Mobile quality audit systems ensure consistent customer experience
- Wireless Point of Sale systems bring staff closer to customers
- Easy to use and install

Colubris Networks MultiService WLAN systems make it easy and affordable for hotels and restaurants to give their employees, guests, customers, suppliers, and partners mobile access to network services.

Learn more at www.colubris.com

"Our first priority was to deliver secure, high quality guest access to the Internet. Wireless was the obvious answer. . . At the same time, we determined that wireless access was ideal for other business systems being updated around the property. We selected Colubris Networks to provide the hospitality industry expertise."

General Manager of a leading hotel chain

WeRoam offers a complete set of modular wholesale products for WLAN roaming. All services have been designed to be easily bundled with existing communication products of Internet, Enterprise, GSM and VoIP service providers.

A worldwide Public WLAN Aggregator

Through a single contract with WeRoam, customers gain wholesale access to one of the world's largest Public Wireless LAN network with more than 30 '000 hotspots.

A WLAN Roaming Hub to host the operation of roaming relations

The WLAN roaming Hub service is designed for WLAN operators who want to outsource the implementation and operation of part or all of their roaming relations with other WLAN operators.

Client software to access the Internet

WeRoam is a strong believer that client software enhances the end-user experience when accessing public hotspots. Connecting to the Internet must be as simple as a click on the "connect" button.

A marketing presence on Hotspot Directory Web portal

Communication of the location of hotspots is a key to drive the use of wireless broadband services. The WeRoam Hotspot Directory Portal is the ideal whitelabeled Web tool to promote the coverage of a Public WLAN service.
